**Opening Date

***DRAFT/Working Document***  
**The County of El Paso, Texas**  
**Request for Information (RFI)**

**I. Administrative Information**

El Paso County (herein referred to as the County) seeks information from private or public Interested Parties for the design and construction of energy efficiency and renewable energy projects in existing and proposed County facilities, structures, and other properties.

Our intent is to collect and assess information that can lead to a Request for Proposals (RFP) for services to assist the County in meeting its Renewable Energy Policy goals.

**This Request for Information (RFI) is NOT a solicitation for such products or services.** All information is submitted to the County on a voluntary basis with the understanding that the purpose of this RFI is to gather information.

El Paso County is interested in receiving information from any interested parties, such as those interested in and knowledgeable about energy efficiency, efficient building design and construction (including carbon neutrality and LEED certification), solar technology (including photovoltaic electrical systems and passive solar applications), and any others interested in energy efficiency pilot projects and innovative renewable energy technology applications. The County welcomes proposals for projects that are either large or small in scale, as well as pilot or demonstration projects.

Solar technology projects are not limited to buildings. For example, the County has three swimming pools that could host a demonstration solar heating project. The County will also evaluate companion projects that extend the cost savings value of an energy efficiency or renewable energy project.

**A. Disclosure of Responses**

El Paso County reserves the right to allow any and all information submitted in response to this RFI to be reviewed by various departments within the County. This enables staff to outline future goals and objectives and craft any Requests for Proposals related to renewable energy or energy efficiency. The County will not publicly disclose any information until such time as a competitive solicitation is issued, and an award has been, or the County determines it will not solicit a competitive bid. At such time, all materials will be made available for public disclosure, with the exception of those materials determined by the County to be confidential and/or proprietary.

## B. Confidential/Proprietary Information

Any restrictions on the use or inspection of the material contained within responses to the RFI must be clearly stated in the response. A written request for confidentiality must be submitted with the response, along with a justification for considering the material confidential/proprietary. Respondents must state specifically what elements of their proposal are included in their request for confidentiality.

All confidential/propriety information must be clearly labeled as such and packaged separately from the rest of the response. Entire responses will not be considered confidential. Materials that would not be considered confidential in response to an RFP will not be considered confidential in response to this RFI.

## II. Introduction

El Paso County has prioritized renewable energy technology and energy efficiency for many reasons. The County recognizes the economic development opportunities of the emerging green economy. It is poised to take full advantage of the desert southwest's abundant sunshine. Improving energy efficiency and reducing energy consumption saves taxpayer money and allows the County to model sustainable energy practices.

### A. Purpose

- Retrofitting existing structures/facilities/properties to meet, at minimum, Silver LEED efficiency standards where feasible;

- Encouraging, at minimum, Energy Star efficiency standards for County affordable housing projects and community centers owned and operated by the County;
